	Stage 1 - Eligibility		Stage 2 - Development			Stage 3 - Delivery & Evaluation	
	Identify project requirements and submit proposals to the Combined Authority. Determine resources required and determine tolerances around risk, cost, benefits and outcomes.		Test feasibility of the proposals and consider the intervention options. Develop details for cost, outputs, impacts, value for money and delivery. Consult stakeholder and public to support the development of the proposals. Establish monitoring and evaluation baseline.			Delivery the project. Put monitoring and reporting arrangements in place. Once the project is complete commence monitoring and evaluation (benefits realisation).
